

CONTENTS:

- The effects the Earth , Sun and Moon attraction on satellite's orbital motion (1-10)**
- Applying Nuclear Shell Model To Study The Energy Levels For ^{18}F nucleus (11-14)**
- Aperture Antenna with Low Side Lobe Level (14-28)**
- The effect of BDN-I dye ground-state absorption cross-section in Nd:YAG giant laser pulse power (29-44)**
- Electrical and optical Properties of Poly(Crystal Violet Terephthalate) (PCVT) (45-53)**
- Preparation of Silicon Nano-Structure by Laser-Induced Etching Process (54-60)**
- (d.c) electrical conductivity of ($\text{CdSe}_{0.5}\text{Te}_{0.5}$) thin films which formed at different rates of deposition (61-70)**
- Effect of Ratio of Cobalt Concentration on the Hardness for (WC-Co) Alloys when Irradiated by Electrons (71-78)**
- Studying the capacitance – voltage (C-V) characteristics for the metal-oxide-semiconductor field- effect transistor MOSFET fabricated by photolithography technique (89-94)**
- Study of the energy level for ^{30}Si nuclei by applying shell model by using pure configuration (95-100)**
